

The United Kingdom

Geography focus
Sycamore Class Spring 2022

Write a narrative based on a UK environmental issue

I know how I can contribute to a reduction in climate change.

My paintings convey a purpose, considering mood and composition,

To create a landscape painting inspired by David Hockney

I can explore ideas and collect visual information

I have an increasing awareness of great artists and can use their work as inspiration

I know how erosion, deposition and flooding can affect people

I find out about places and the features in those places by either going to that place to observe or by deciding which will be the best sources of information to look at.

I make very careful and precise measurements so that joins, holes and openings are in exactly the right place.

I select and combine my skills, techniques and ideas.

Investigate physical geographical features locally and nationally

Learn traditional British dances

Make a model of a British landmark

I work from my own detailed plans, modifying them where appropriate.

Describe and understand key aspects of types of settlement and land use, economic activity and

Collect statistics about people and places and present them in the most

I can identify how a place where people live has

I refine my dances with style and artistic intention.

I ask, "Which PHYSICAL and HUMAN features does this place have?"

I can develop characters in detail

Extend and refine their use of narrative language features
