

Willow Class Homework- Science; Flowering Plants

Date- 23/6/23

We are learning about flowering plants in Science at the moment. For your homework this week, I would like you to create a poster of any flowering plant of your choice. Draw (and colour if you want to) a large, clear, scientific diagram of your chosen flowering plant. Then, label the following parts clearly;

**flower, stem, leaves, roots**

I would then like you to include a fact box for each, to explain the function of the **flower, stem, leaves and roots**.

Remember, it is a poster so think about your presentation and keep your drawing and writing clear and bold so that we can display some on our classroom boards. **For this reason, please do not stick your poster in your homework book this week.**

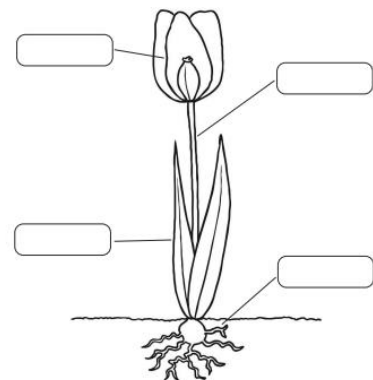

**Challenge;** Can you add any of the following labels to show other parts of the flowering plant that you might know;

**pollen, anther, filament, sepal, petal, stigma, style, ovary, ovule**
