

Practise your x table facts for the 3, 4 and 8x tables by completing the triangles below.

1.

$$\begin{array}{r} 24 \\ \div \\ 8 \end{array} = \square$$

2.

$$4 \times \square = 9$$

3.

$$\square \times 5 = 15$$

4.

$$\begin{array}{r} 21 \\ \div \\ 3 \end{array} = \square$$

5.

$$8 \times \square = 9$$

6.

$$\square \times 5 = 40$$

7.

$$\begin{array}{r} 20 \\ \div \\ 4 \end{array} = \square$$

8.

$$4 \times \square = 6$$

9.

$$\square \times 12 = 36$$

10.

$$\begin{array}{r} 12 \\ \div \\ 3 \end{array} = \square$$

11.

$$8 \times \square = 8$$

12.

$$\square \times 7 = 56$$

1.

$$\begin{array}{c} 80 \\ \div \quad \div \\ 8 \quad \times \quad \square \end{array}$$

2.

$$\begin{array}{c} \square \\ \div \quad \div \\ 4 \quad \times \quad 8 \end{array}$$

3.

$$\begin{array}{c} 12 \\ \div \quad \div \\ \square \quad \times \quad 3 \end{array}$$

4.

$$\begin{array}{c} 6 \\ \div \quad \div \\ 3 \quad \times \quad \square \end{array}$$

5.

$$\begin{array}{c} \square \\ \div \quad \div \\ 8 \quad \times \quad 2 \end{array}$$

6.

$$\begin{array}{c} 3 \\ \div \quad \div \\ \square \quad \times \quad 1 \end{array}$$

7.

$$\begin{array}{c} 20 \\ \div \quad \div \\ 4 \quad \times \quad \square \end{array}$$

8.

$$\begin{array}{c} \square \\ \div \quad \div \\ 4 \quad \times \quad 4 \end{array}$$

9.

$$\begin{array}{c} 24 \\ \div \quad \div \\ \square \quad \times \quad 3 \end{array}$$

10.

$$\begin{array}{c} 96 \\ \div \quad \div \\ 8 \quad \times \quad \square \end{array}$$

11.

$$\begin{array}{c} \square \\ \div \quad \div \\ 4 \quad \times \quad 7 \end{array}$$

12.

$$\begin{array}{c} 88 \\ \div \quad \div \\ \square \quad \times \quad 11 \end{array}$$
